

DATRAN Supervisor

DATRAN Supervisor is the complete alarm and system management tool for the DATRAN™ VI SCADA system. DATRAN Supervisor is user friendly and is the ideal tool for system managers and contractors to monitor and view the entire DATRAN system.

Key Features include:

- View current and historic alarms
- View and monitor all DATRAN sites
- Multiple window display options
- Text SMS Messages directly to operators
- Alarm notes - Ability to add notes and create an electronic log book for events
- Selectable text size & customisable colour options
- Password protected login & access level - Now including Wonderware Authentication
- Fast and efficient operation over TCP/IP connections

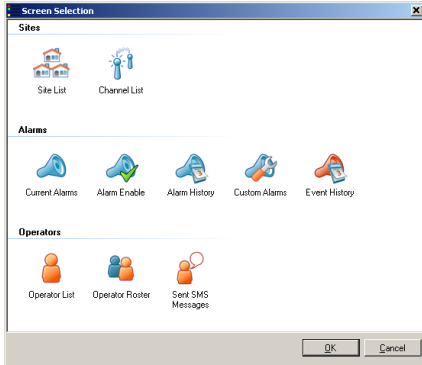

The latest version of DATRAN Supervisor extends the traditional alarm management functionality to also include:

- Operator Management - Edit phone numbers and access level changes
- Duty Roster - Select who is "On call" and to receive system SMS alarms
- Mini Trending - View the recent history & trend of a point
- Spoken Alarm capability
- Communication Channel Statistics - Improved diagnostics and system capacity planning
- RSS Feeds - Check for upgrades and Telco SMS availability

Key Benefits include:

- User friendly real time monitoring of site status
- Low cost system visibility
- Easy distribution to multiple staff & contractors over LAN or WAN
